Resolution to Approve Amendment to Midtown Ann Arbor Development Agreement to Modify Sequence of Construction

The developer of Midtown has requested modifications to the construction sequence and to add utility phases, which city staff supports. This allows for building permits to be issued in phases while infrastructure is being completed. Additionally, the City and developer seek to clarify the timing of the water pressure booster station be completed before issuance of any certificate of occupancy. These changes necessitate amendment to the Midtown Ann Arbor Development Agreement.

Prepared By: Chris Cheng, City Planner
