Resolution to Approve the Purchase of High Calcium Pebble Quicklime from Huron Lime, Inc. for the Wastewater Treatment Plant, Bid No. ITB-4168A (\$140,000.00)

Your approval is requested to authorize the purchase of high pebble calcium quicklime from Huron Lime, Inc. for the City's Wastewater Treatment Plant (WWTP) at an estimated cost of \$140,000.00 for FY12.

The WWTP uses two varieties of high calcium quicklime, dust lime and pebble lime. Dust lime is used to help control odors from biosolids destined for disposal in a landfill. Pebble lime is slaked and added to biosolids to stabilize it for land application. High calcium quicklime is essential for the WWTP's continued compliance with state regulations.

An invitation to bid (ITB) to supply high calcium quicklime for the WWTP was initially offered in ITB-4168. There was just one respondent to the invitation. Upon review of that bid, it was determined that based on the anticipated amount of lime to be purchased, the cost would substantially exceed the WWTP's budgeted amount for the chemical.

An invitation to bid was re-offered under ITB-4168A. The following suppliers submitted bids in response to ITB-4168A:

Huron Lime, Inc.	\$142.00 / ton pebble lime, delivered
Mintech Lime	\$165.30 / ton pebble lime, delivered

WWTP staff reviewed the bids for specification compliance and cost. Staff recommends that Huron Lime, Inc. be approved as the lowest responsible bidder to supply high pebble calcium quicklime to the WWTP for FY12.

Additionally, it is recommended that the agreement be extended for up to three additional years at no increase in cost if the supplier and the City Administrator agree. Approval for subsequent fiscal years is subject to the availability of funding.

Huron Lime, Inc. received Contract Compliance approval from Human Resources on August 3, 2011.

Funds to finance this purchase are included in the approved FY12 WWTP Operation and Maintenance budget for the Sewage Disposal System.

Prepared by: Ed Sajewski, Contract and Project Services Manager, WWTSU
