Implementation Prioritization for the Malletts Creek Association's April 2007 Watershed Recommendations

On August 20, 2007 the Ann Arbor City Council adopted the Malletts Creek Association's (MCA) April 2007 Watershed Recommendations (See Council Resolution R-393-8-07 for details). In that resolution, City Council charged the Malletts Creek Coordinating Committee (MCCC) with developing a plan for implementation of the MCA recommendations and amending the current Action plan from the April 2000 Malletts Creek Restoration Plan. The MCCC has developed a Malletts Creek Restoration Activity Schedule spreadsheet that combines the MCA recommendations with the recommendations from the April 2000 Malletts Creek Restoration Plan. MCCC has prioritized all of the recommendations from the two documents and will begin to focus efforts on the highest priority recommendations.
