Resolution to Approve Professional Service Agreement with EQ Industrial Services, Inc. for Emergency Spill Response Services (Not to Exceed \$50,000.00)
Your approval is requested for the Professional Service Agreement for Emergency Spill Response Services with EQ industrial Services, Inc.

The Clean Water Act prohibits discharge of polluting material into Waters of the State, which include the Huron River and the seven creeks that flow through portions of the city. The City of Ann Arbor's stormwater system serves as a direct conduit to these waters and as such, any spill of fuel, oil, grease, paint or other polluting materials that has the potential to affect water quality must be immediately contained and removed. The City of Ann Arbor does not have the resources to contain and remediate large spills (>25 gallons). Thus, having a contract with an environmental remediation company is necessary to ensure immediate response during a spill event.

In November 2008, the City issued a request for proposals (RFP 720) to provide emergency spill response services to the City's Field Operations Unit. Three proposals were received and were evaluated for company location and response time, level of service offered, equipment inventory and hourly rates. EQ Industrial Services, Inc. (EQ), located in Ypsilanti, MI was selected as the most qualified firm to perform this work. EQ is in close proximity to Ann Arbor, offers a full range of cleanup services, and has a proven history of high quality, cost-effective spill response. The contract shall be structured with not-to-exceed limits of \$50,000.00, with no minimum required expenditures.

It is therefore, recommended that City Council approve the Professional Service Agreement with EQ in an amount not to exceed \$50,000.00, as the company selected to provide Emergency Spill Response Services to the Field Operations Services Unit for FY09 and FY10.

The City of Ann Arbor does invoice responsible parties for expenses incurred when responding to and cleaning up spills.

EQ has received Human Rights approval on November 17, 2008, and complies with the living wage ordinance.

These contracted services are to be funded on an as-needed basis from the approved FY09 Stormwater System Operation and Maintenance Budget and the FY 10 Stormwater System Operation and Maintenance Budget if so approved by Council.

Prepared by: Molly Wade, Water Quality Manager

Reviewed by: Sue F. McCormick, Public Services Administrator

Approved by: Roger W. Fraser, City Administrator

Whereas, The Field Operations Services Unit requires Emergency Spill Response Services support to address spills of polluting materials in excess of 25 gallons;

Whereas, The Emergency Spill Response Services will be funded from the approved FY09

Stormwater System Operating budget and the FY10 Stormwater System Operating budget, if so approved by Council;

Whereas, Of the three proposals received, EQ was the selected company that best fit the qualifications; and

Whereas, EQ has received Human Rights approval on November 18, 2008, and complies with the Living Wage Ordinance;

RESOLVED, That Council accepts the proposal and awards a Professional Services Agreement to EQ in an amount not to exceed \$50,000.00, for Emergency Spill Response Services;

RESOLVED, That the Mayor and City Clerk be authorized and directed to execute the agreement for services after approval as to substance by the City Administrator and approval as to form by the City Attorney; and

RESOLVED, That the services be funded by the approved FY09 Stormwater System Operation and Maintenance Budget and the FY 10 Stormwater System Operation and Maintenance Budget, if so approved by Council.
