Resolution to Approve a Fiber and Conduit Use Agreement with Ann Arbor SPARK
Ann Arbor SPARK (SPARK) requested a lateral be extended to their facility from the new city Fiber Optic Network (FON). This resolution seeks approval of a Fiber and Conduit Use Agreement for this non-governmental entity which is similar to the governmental Fiber and Conduit Use Agreements previously approved for the DDA, AAATA, and the AADL.

Resolution R-16-489, approved by City Council on December 19, 2016, recognized that contracts for use of the City FON and by third parties, including funding by those third parties of lateral build outs for connection to their locations, would be brought back to City Council for approval. On September 5, 2017, City Council approved third party agreements with the DDA, AAATA, and the AADL (Resolution R-17-337).

SPARK requested a build out to their location and committed to cover the cost. For logistical and efficiency reasons, the build out was completed before a contract with SPARK for the funding could be brought to City Council for approval. To memorialize and implement SPARK's commitments to cover those capital costs, and SPARK's commitments and obligations as a third party user of the City FON, staff requests approval of the attached Fiber and Conduit Use Agreement. SPARK agrees to pay for the \$29,800.00 cost for the capital build to SPARK. The Agreement calculates and provides for both a one-time buy-in fee and annual usage fees, as well as all related obligations. However, because SPARK will not use the facilities immediately, those payment and other obligations related to usage are not activated at this time. They will be triggered if SPARK starts using the City FON directly. If SPARK becomes a user of the City FON through an arrangement with a service provider, the City has reserved the right to enter into a separate user agreement with the service provider to cover both payment and other user obligations.

Staff recommends approval of the Fiber and Conduit Use Agreement with SPARK.
