Resolution to Authorize Extension of the Contract with Scodeller Construction, Inc. to include work for the Street Crack Treatment Project-FY2019 (\$200,000.00)

Attached for your review and approval, please find a resolution to authorize a one-year extension of a unit-price contract (ITB No. 4476) with Scodeller Construction, Inc., to add \$200,000.00 for the work of Street Crack Treatment Project-FY2019, which involves sealing cracks on various major and "local" in the City.

As background, the City awarded Scodeller Construction, Inc. the contract at issue for the Street Crack Treatment Project-FY2017. The contract is a unit price contract and contemplates that quantities used in construction may vary. The contract allows for a one-year extension for fiscal year 2019, to allow for additional work, and City staff recommends exercising this option.

Scope and Schedule

The Street Crack Treatment Project-FY2019 consists of crack sealing approximately 7 miles of major streets, and 5 miles of "local" streets, throughout the City to maintain and preserve their good condition. The current schedule is for work to begin in mid-August, 2018 and reach completion by June 30, 2019. As part of the project, Scodeller Construction, Inc. will provide an exact schedule, as required to coordinate with planned City and other events, such as Art Fair, Michigan home football games, holidays, and other construction projects.

Budget/Fiscal Impact

Funding for this work is available in the adopted and respective FY 2019 Public Services Area, Major and Local Street Fund Operation and Maintenance Budgets.

Funding Source	Const. Cost	Total Proj. Cost	Revenue
FY2019 Major Street Fund	\$150,000.00	\$180,000.00	\$180,000.00
FY2019 Local Street Fund	\$ 50,000.00	\$ 60,000.00	\$ 60,000.00

Total	\$ 200,000.00	\$240,000.00	\$240,000.00
--------------	----------------------	---------------------	---------------------

The project will have no additional operational impacts.

Maintenance of Traffic

For all the streets, the contract requires maintaining “local” access including that to driveways and side streets throughout the duration of construction. On major streets, the contract requires maintaining traffic utilizing lane closures and traffic shifts, or flag control. On “local” streets, the Contractor will utilize part width construction and a moving work zone operation with flag control to maintain traffic.

Public Outreach

The Contractor, working with staff, will provide advance construction notice to residents and business owners affected by this project. The City will notify the public of any temporary traffic control impacts on major streets.

Scodeller Construction, Inc. complies with the City of Ann Arbor Non-Discrimination, Prevailing Wage, and Living Wage Ordinances.
