Resolution to Approve an Amendment to Professional Services Agreement with Wade Trim, Inc. for Construction Engineering Services for the Washtenaw Avenue Water Main Replacement Project (\$43,569.80)

Attached for your review and approval, please find a resolution approving an amendment to the professional services agreement dated July 30, 2008 for construction engineering services in the amount of \$43,569.80 with Wade Trim, Inc. (Wade Trim).

The FY 2009-2014 Capital Improvements Plan (CIP) includes project UT-WS-06-14, the Washtenaw Avenue Water Main Replacement Project. The project consists of replacing approximately 2,900 feet of 12" water main in the Washtenaw Avenue corridor from US-23 to a point approximately 350 feet west of the Washtenaw Avenue/Huron Parkway Intersection (near the Midas Auto Service Store). The project is expected to begin mid-July and be completed by mid-October. We have made the necessary contract provisions such that Washtenaw Avenue and the side streets will not be blocked during the Art Fair or University of Michigan Home football weekends. Most all of the construction will occur at night, but certain road restoration activities will occur during the day in order to minimize the duration of the planned work.

Wade Trim was approved by Council on July 30, 2008 to perform the design engineering associated with this project. The amount of the original agreement with Wade Trim was \$95,084.30. Due to the current workload and staffing of existing projects, it is necessary to retain an outside firm to provide assistance with the construction engineering and to perform surveying and construction staking services. As a result, we are recommending that Wade Trim provide these additional services based on their knowledge of the project, staff qualifications, past experience, and their fee schedule. The amendment includes \$38,569.80 for these services.

This amendment also includes an amount of \$5,000.00 for additional design engineering and drafting services that were required to be performed. The additional design and drafting services were

required because certain water valves were broken during the last major water main break that occurred during the winter and needed to be replaced in order to facilitate the construction of this project.

The total amount of this amendment is \$43,569.30, bringing the total contract amount to \$138,654.10. Authority for the City Administrator to approve amendments for additional services up to \$10,000 also is requested and recommended.

The form of the contract with Wade Trim is the standard professional services agreement drafted by the City Attorney. Wade Trim received Human Rights Approval on June 10, 2009 and Living Wage approval on April 28, 2009.

Funding for this project is included in the approved Capital Budget. This project has also been included in our Drinking Water Revolving Fund (DWRF) project plan. We are hopeful that we will be selected to receive this funding. If we are successful, we then expect to receive low interest financing on approximately 60% of the principle amount with the remaining portion being forgiven by the DWRF program. We expect to receive notification from the State of Michigan on, or about, August 1, 2009 if we have been selected to receive DWRF funding.
