Resolution to Approve a Purchase Order to New World Systems for Financial System Annual Software Support and Maintenance Agreement (\$64,040.00)

Attached for your review and action is a resolution to approve the annual software support and maintenance agreement with New World Systems for the City's financial system software, used for budgeting, invoicing, accounts payable, financial tracking and reporting for FY2014 in the amount of \$64,040.00.

The New World Systems for Financial System has been instrumental in allowing business units to systematically manage and control spending. The system allows for monthly reporting and workflow routing for approvals of accounts payable invoices, accounts receivable, purchases, etc. The budgeting software has allowed employees, administration, and management to track, process, manage, and review the City's budget from the beginning of the budget planning process through the approval of the new budget. It is imperative to maintain the agreement with New World Systems to receive application updates, and maintain support.

This is a planned and budgeted expense in the approved FY2014 Information Technology Services Unit budget.

New World Systems received Human Rights and Living Wage compliance approval on April 16, 2013.

Prepared by: Joshua Baron, Applications Delivery Manager, ITSU

Reviewed by: Tom Crawford, Financial Services Administrator and CFO

Approved by: Steven D. Powers, City Administrator
