File #: 19-1713, **Version:** 1

DR19-010; 402 E Huron Street A design plan for a 9-story hotel at 402 E Huron. Brick, in two colors, is the predominant exterior material, with a strong metal panel corner. The base of the building is a transparent storefront, including a canopy at the main corner entrance extending along both sides. The building is set back from East Huron Street to provide a pedestrian plaza along that side, and the project is pursuing LEED Gold certification. A driveway will wrap around the rear of the site to provide vehicle access and valet service.
